

Question

1. less command
2. more command
3. vi command

To execute and display the results of the less, more, and vi commands in Kali Linux.

Command:

Use:

The image contains two side-by-side terminal screenshots. The left terminal shows a sequence of commands: `cd ~/Desktop`, `mkdir ex2`, `cd ex2`, `touch test.txt`, `echo "This is kali linux experiment2">test.txt`, `cat test.txt` (outputting "This is kali linux experiment2"), and `less test.txt`. The right terminal shows the output of `cat test.txt` as "This is kali linux experiment2" followed by several tilde (~) characters, and ends with `(END)`.

Command:

Use:

The `more` command is used to display the contents of a text file page by page.

```
(lasya@kali)-[~/Desktop/ex2]  
$ more test.txt  
This is kali linux experiment2
```

3. VI COMMAND

Command:

vi sample.txt

Use:

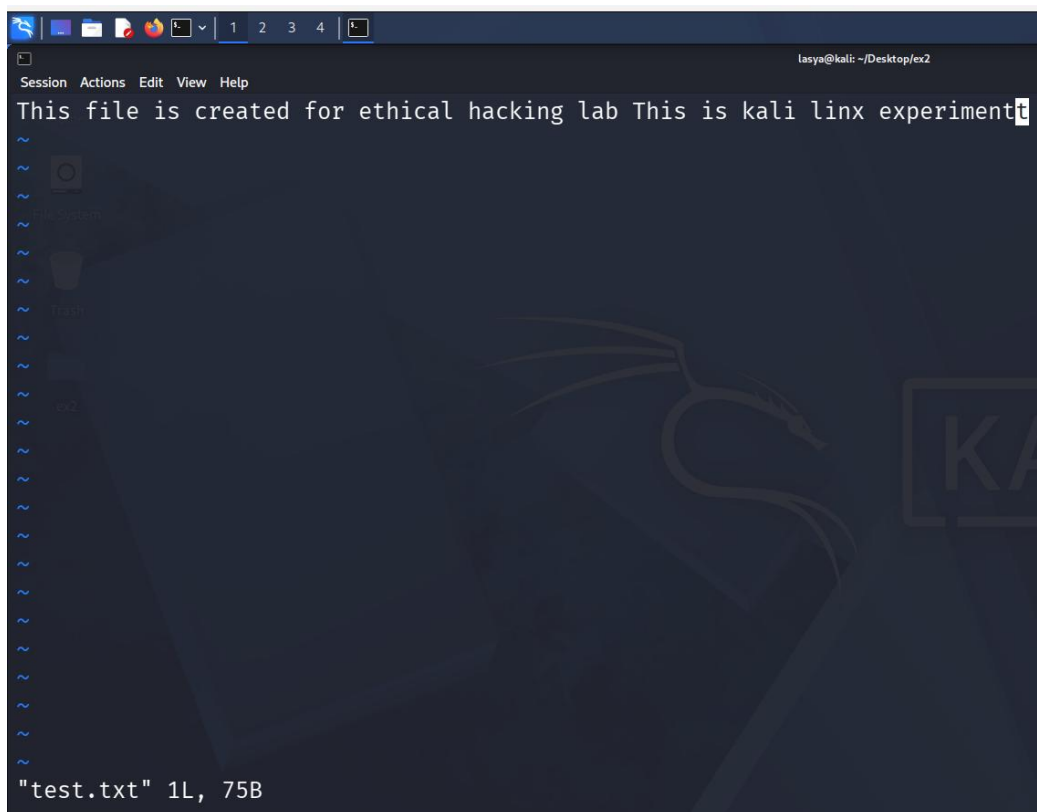

The vi command is used to create, open, and edit text files.

To exit vi after viewing/editing:

Esc

:q

Enter

Result

Thus, the less, more, and vi commands were successfully executed in Kali Linux and their results were displayed.
