

EXERCISE – 1

Question

Execute and display the results of the following commands in Kali Linux Operating System:

1. rm command
2. users command
3. tree command EthicalhackingListofExp-25

Aim

To execute and display the results of the rm, users, and tree commands in Kali Linux.

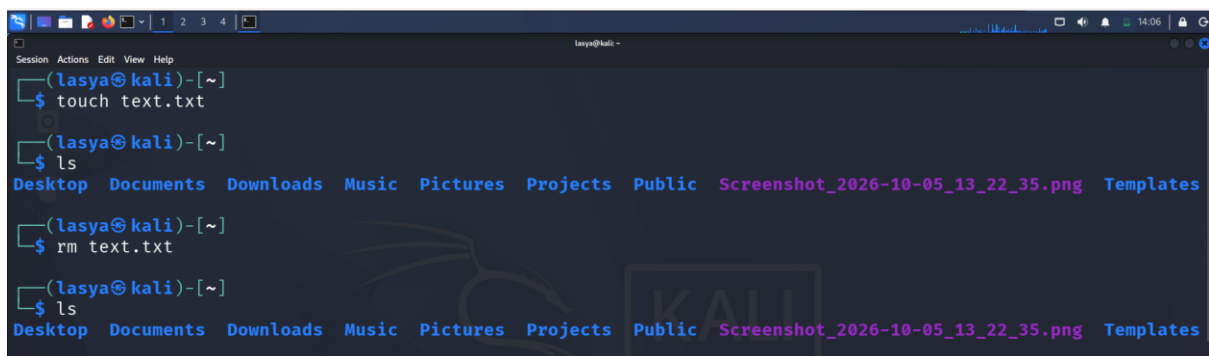

1. RM COMMAND

Command:

rm sample.txt

Use:

The rm command is used to **remove or delete files and directories**.

A screenshot of a Kali Linux terminal window. The prompt is (lasya@kali)-[~]. The user enters 'touch text.txt', then 'ls', which shows a directory listing including 'Screenshot_2026-10-05_13_22_35.png'. Then the user enters 'rm text.txt', and finally 'ls' again, showing the same directory listing but without the removed file. The terminal has a dark background with a 'KALI' logo watermark.

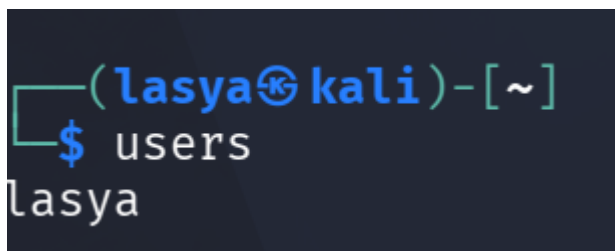

2. USERS COMMAND

Command:

users

Use:

The users command is used to **display the users currently logged into the system**.

A close-up screenshot of a terminal window showing the prompt (lasya@kali)-[~]. The user enters the command 'users', and the output 'lasya' is displayed on the next line.

3. TREE COMMAND

Command:

tree

Use:

The tree command is used to **display the directory and file structure in a tree-like format**.

```
(lasya@kali)-[~]  
$ tree

10 directories, 7 files
```

Result

Thus, the rm, users, and tree commands were successfully executed in Kali Linux and their results were displayed.
