

EXERCISE – 3

Question

Execute and display the results of the following commands in Kali Linux Operating System:

1. tree command
2. head command
3. tail command

Aim

To execute and display the results of the tree, head, and tail commands in Kali Linux.

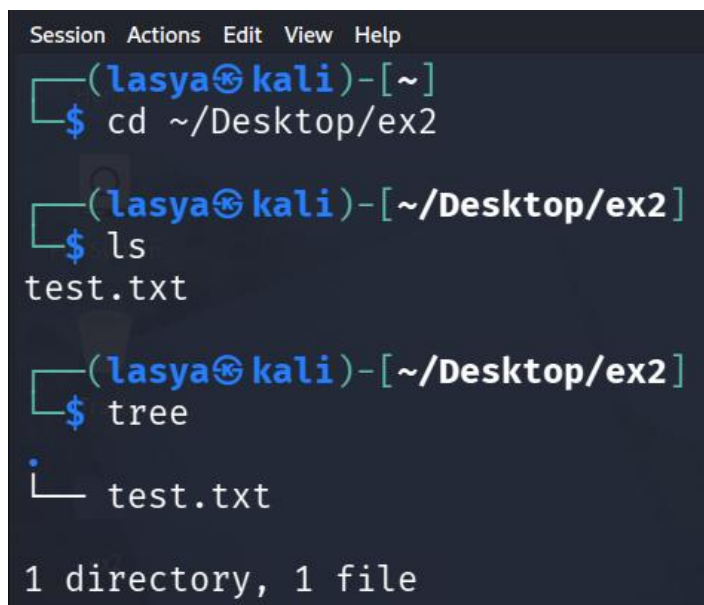

1. TREE COMMAND

Command:

tree

Use:

The tree command is used to display files and directories in a tree-like hierarchical structure.

A screenshot of a terminal window with a dark background. The window has a menu bar at the top with 'Session', 'Actions', 'Edit', 'View', and 'Help'. The prompt is '(lasya@kali)-[~]'. The user enters 'cd ~/Desktop/ex2'. The prompt changes to '(lasya@kali)-[~/Desktop/ex2]'. The user enters 'ls', and the output is 'test.txt'. The user enters 'tree', and the output is a tree diagram showing a directory '.' containing a file 'test.txt'. At the bottom, it says '1 directory, 1 file'.

```
Session Actions Edit View Help
(lasya@kali)-[~]
$ cd ~/Desktop/ex2
(lasya@kali)-[~/Desktop/ex2]
$ ls
test.txt
(lasya@kali)-[~/Desktop/ex2]
$ tree
.
├── test.txt

1 directory, 1 file
```

2. HEAD COMMAND

Command:

head sample.txt

Use:

The head command is used to display the beginning (first few lines) of a text file.

```
(lasya@kali)-[~/Desktop/ex2]
$ echo "line 1" > test.txt

(lasya@kali)-[~/Desktop/ex2]
$ echo "line 2" >> test.txt

(lasya@kali)-[~/Desktop/ex2]
$ echo "line 3" >> test.txt

(lasya@kali)-[~/Desktop/ex2]
$ echo "line 4" >> test.txt

(lasya@kali)-[~/Desktop/ex2]
$ echo "line 5" >> test.txt

(lasya@kali)-[~/Desktop/ex2]
$ head test.txt
line 1
line 2
line 3
line 4
line 5
```

3. TAIL COMMAND

Command:

tail sample.txt

Use:

The tail command is used to display the end (last few lines) of a text file.

```
(lasya@kali)-[~/Desktop/ex2]
$ tail test.txt
line 1
line 2
line 3
line 4
line 5
```

Result

Thus, the tree, head, and tail commands were successfully executed in Kali Linux and their results were displayed.
